

Challenging position in a high-tech environment

Expert in analog electronics / ASICs

The position includes the following areas of responsibility:

- Develop and establish models and specifications for state-of-the-art analog interface-ASICs for MEMS sensors
- Interface to ASIC design house
- Development of low noise, low power, high-accuracy, compact electronics for our products and test cards

Qualifications/skills:

- MSc – good theoretical skills
- ASIC development
- Low-noise «front-end»-electronics for ADCs, filtering, references, voltage regulators
- High precision/high speed ADCs and DACs
- Precise and thorough
- Structured and ability to take responsibility

We offer:

Exciting technical challenges, dedicated colleagues and competitive compensation

Do you feel intrigued? Please send us an application including your CV and tell us why we should choose you for the job.
